I have examined the attached photos of the instrument described below, but have not seen the instrument itself. Below is my estimate, based on these photos, of the instrument's value; however, it is not possible to judge from photos alone the exact state of originality and need of repair, so my appraisal is only accurate insofar as the photos are representative of the actual condition of the instrument.

We certify the guitar described below is, a Fender John Mayer Custom Shop Black 1 model made in the year 2010.

Description: We have been provided the following description: "This is a Fender John Mayer Custom Shop Black1, serial number JC1626, which can be located on the back of the headstock. I am unsure as to the year of the guitar, but think it may be a 2010. I am not aware of any modifications or needed repairs." According to Fender records 83 of this model were produced and were made by Fender master builder John Cruz. This model features a heavily reliced black finish, rosewood fingerboard, spaghetti logo peghead decal, tremolo bridge, and other specifications designated by John Mayer.

Current market value: \$20,000 (twenty thousand dollars)

A large, fluid, handwritten signature in black ink, which appears to read "George Gruhn".

George Gruhn
